***A NORTH STATE FIELD TRIP
ADVENTURE FOR ALL AGES***

WHAT TO EXPECT

The Patrick Ranch Museum is an Interactive Agricultural and Natural History Museum situated on 28 acres between the cities of Chico and Durham.

Led by Patrick Ranch volunteers, students will experience the proud heritage of this area as told through many venues including: the evolution of transportation and earth, life and physical sciences, agricultural development, California history, and the Native American story.

We provide a unique learning experience that encourages hands-on learning, respect for our environment and stewardship of our youth, which is vital to the long-term preservation and values of our historic past and natural resources.

Activities are designed to align with California Common Core State Standards in 1st, 2nd, 3rd and 4th grades.

FIELD TRIP OPPORTUNITIES

1st – 2nd Grades

Snappy Stems – function of plant stems.

19th Century Farming – Chico and Durham, California

Show me the Energy – plant and animals need energy to live and grow.

Supreme Seeds – seeds of edible plants.

3rd Grade

Evolution of Farming – inventions, people and product distribution.

History of Local Communities – change over time.

Local American Indians – supported by authentic artifacts and local stories.

4th Grade

Do Bees Have Knees? – the importance of bees to our food supply.

Tank House – purpose of a tank house.

Acorns to Flour – tools used by Native Americans.

Way to Go H2O – erosion tables and meandering streams.

Plant Planet – Mediterranean climate and some of the 400 California crops it supports.
